

## Nehru Gram Bharati (Deemed to be University) Prayagraj, Uttar Pradesh, INDIA

# Syllabus [As per NEP-2020 Regulations] [NHEQF Level 4.5 to 6.0]

B.Sc./B.Sc. (Honours)/ (Honours with Research)
in
Physics

[Department of Physics]

[Effective From 2025-26 Onwards]

### **Board of Studies**

Dated: 10-06-2025

- 1. Dr. Vikram Singh, Head, Department of Physics, NGB (DU), Chairman
- 2. Dr. Sanjay Kumar, Assistant Professor, Dept. of Physics, NGB (DU), Member
- 4. Dr. Archana Shukla, Assistant Professor, Dept. of Mathematics, NGB (DU), Member
- 4. Dr. Tarkeshwar Trivedi, Dept. of Physics, University of Allahabad, External Member (Subject Expert)
- 5. Prof. Devendra Kumar Mishra, Professor, Dept. of Physics, BHU External Member (Subject Expert)
- 6. Prof. Ram Kripal, (Retd.), Ex-Professor, Dept. of Physics, NGB(DU), Member

#### **Attendance Sheet & Minutes**

(DEEMED TO BE UNIVERSITY) KOTWA-JAMUNIPUR-DUBAWAI. PRAYAGRAJ- 221505

#### DEPARTMENT OF PHYSICS

Date: 12/06/2025

A meeting of the Board of Studies (BOS) of the Department of Physics was held on 12/06/2025 at 02:30PM in the Department of Physics. The following members were present.

- 1. Dr. Vikram Singh- Chairman
- 2. Dr. Sanjay Kumar- Member
- 3. Dr. Archana Shukla- Member
- 4. Prof. Devendra Kumar Mishra- External Expert (ONLINE)
- 6. Dr. Tarkeshwar Trivedi- External Expert
- 7. Prof. Ram Kripal- Ex- Dean, Head, DoP, FoS, NGBU ( OMLINE)

#### Agenda:

- A. Confirmation of the minutes of the previous meeting held on 04 April 2024, along with the Action Taken Report (ATR).
- B. Current Agenda:
- 1. To consider the inclusion of minor papers in the B.Sc. syllabus.
- To revise the credit, marks distribution and correct minor errors in the syllabus.
- 3. To update the syllabus of M. Sc. & Ph. D.
- 4. Any other matter with the permission of the Chair.

#### Resolutions/Decisions Taken:

1. Approval of Previous Minutes:

The minutes of the previous meeting dated 04 April 2024, along with the Action Taken Report, were read and approved unanimously.

- 2. Syllabus Modification and Credit Revision:
  - a. It was resolved to add 7 minor papers to the existing B.Sc. NEP 2020 syllabus.
  - b. The marks distribution for internal and external assessments is revised from 20+80 to 40+60.
    - c. The total credits per semester have been revised:
      - i. A reduction from 22 credits to 20 credits per semester.
      - The overall program credits have been revised from 180 credits to 160 credits.
  - Minor typographical and formatting errors in the syllabus were reviewed and corrected.
- 3. No any modification to M. Sc. & Ph. D. Syllabus.
- 4. Other Matters:
  - a. No additional matters were raised.
  - b. No further resolutions were presented.

#### Conclusion:

The meeting concluded with a vote of thanks by the Chairperson to all members for their active participation and valuable contributions.

Samp 12/06/2025

#### **Introduction of the Programme:**

#### [a] Introduction:

The NEP-2020 offers an opportunity to effect a paradigm shift from a teacher-centric to a student- centric higher education system in India. It is based on Outcome Based Education, where the Graduate Attributes are first kept in mind to reverse-design the Programs, Courses and Supplementary activities to attain the graduate attributes and learning outcomes. The learning outcomes-based curriculum framework for a degree in B.Sc. (Honours/Honours with Research) in Physics is intended to provide a comprehensive foundation to the subject and to help students develop the ability to successfully continue with further studies and research in the subject while they are equipped with required skills at various stages. The framework is designed to equip students with valuable cognitive abilities and skills so that they are successful in meeting diverse needs of professional careers in a developing and knowledge-based society. The curriculum framework takes into account the need to maintain globally competitive standards of achievement in terms of the knowledge and skills, as well as to develop scientific temper, spirit of enquiry, problem solving skills and human and professional values which foster rational and critical thinking in students.

#### [b] Graduate Attributes:

Type of learning outcomes	The Learning Outcomes Descriptors
Learning outcomes thatare	Disciplinary/
specific to disciplinary/ interdisciplinaryareas of learning	interdisciplinary Knowledge & Skills
Generic learning outcomes	Critical Thinking & problem-solving Capacity
	Creativity
	Communication Skills: The graduates should be able to demonstrate the skills that enable them to:
	<ul> <li>listen carefully, read texts and research papers analytically, and present complex informationin a clear and concise manner to different groups/audiences,</li> </ul>
	<ul> <li>express thoughts and ideas effectively in writing and orally and communicate with othersusing appropriate media,</li> </ul>
	<ul> <li>confidently share views and express herself/himself,</li> </ul>
	<ul> <li>construct logical arguments using correct technical language related to a field of learning, work/vocation, or an area of professional practice,</li> </ul>
	<ul> <li>convey ideas, thoughts, and arguments using language that is respectful and sensitive togender and other minority groups.</li> </ul>
	Analytical reasoning/thinking: The graduates should be able to demonstrate the
	capability to:
	evaluate the reliability and relevance of evidence;
	• identify logical flaws in the arguments of others;
	analyze and synthesize data from a variety of sources;
	<ul> <li>draw valid conclusions and support them with evidence and examples, and addressingopposing viewpoints.</li> </ul>

**Research-related skills:** The graduates should be able to demonstrate:

- a keen sense of observation, inquiry, and capability for asking relevant/ appropriate questions,
- the ability to problematize, synthesize and articulate issues and design research proposals,
- the ability to define problems, formulate appropriate and relevant research questions, formulate hypotheses, test hypotheses using quantitative and qualitative data, establish hypotheses, make inferences based on the analysis and interpretation of data, and predict cause-and-effect relationships,
- the capacity to develop appropriate methodology and tools of data collection.
- the appropriate use of statistical and other analytical tools and techniques,
- the ability to plan, execute and report the results of an experiment or investigation,
- the ability to acquire the understanding of basic research ethics and skills in practicing/doing ethics in the field/ in personal research work, regardless of the funding authority or field of study.

*Coordinating/collaborating with others*: The graduates should be able to demonstrate the ability to:

- work effectively and respectfully with diverse teams,
- facilitate cooperative or coordinated effort on the part of a group,
- act together as a group or a team in the interests of a common cause and workefficiently as a member of a team.

*Leadership readiness/qualities:* The graduates should be able to demonstrate the capability for:

- mapping out the tasks of a team or an organization and setting direction.
- formulating an inspiring vision and building a team that can help achieve the vision, motivating and inspiring team members to engage with that vision.
- using management skills to guide people to the right destination.

*'Learning how to learn' skills:* The graduates should be able to demonstrate the ability to:

- acquire new knowledge and skills, including 'learning how to learn'
  skills, that are necessary for pursuing learning activities throughout life,
  through self-paced and self- directed learning aimed at personal
  development, meeting economic, social, and cultural objectives, and
  adapting to changing tradesand demands of the workplace, including
  adapting to the changes in work processes in the context of the fourth
  industrial revolution,through knowledge/skill development/reskilling,
- work independently, identify appropriate resources required for further learning,
- acquire organizational skills and time management to set self-defined goals and targets withtimelines.
- inculcate a healthy attitude to be a lifelong learner,

*Digital and technological skills:* The graduates should be able to demonstrate the capability to:

- use ICT in a variety of learning and work situations,
- access, evaluate, and use a variety of relevant information sources,
- use appropriate software for analysis of data.
- National & International Perspective considering the current perspective of a Global Village.

*Value inculcation:* The graduates should be able to demonstrate the acquisition of knowledge and attitude that are required to:

- embrace and practice constitutional, humanistic, ethical, and moral values in life, including universal human values of truth, righteous conduct, peace, love, nonviolence, scientific temper, citizenship values,
- practice responsible global citizenship required for responding to contemporary global challenges, enabling learners to become aware of and understand global issues and to become active promoters of more peaceful, tolerant, inclusive, secure, and sustainable societies,
- formulate a position/argument about an ethical issue from multiple perspectives
- identify ethical issues related to work, and follow ethical practices, including avoiding unethical behaviour such as fabrication, falsification or misrepresentation of data, or committing plagiarism, and adhering to intellectual property rights,
- recognize environmental and sustainability issues, and participate in actions to promote sustainable development.

**Autonomy, responsibility, and accountability:** The graduates should be able to demonstrate the ability to:

- apply knowledge, understanding, and/or skills with an appropriate degree of independence relevant to the level of the qualification,
- work independently, identify appropriate resources required for a project, and manage a project through to completion,

*Environmental awareness and action:* The graduates should be able to demonstrate the acquisition of and ability to apply the knowledge, skills, attitudes, and values required to take appropriate actions for:

 mitigating the effects of environmental degradation, climate change, and pollution,

effective waste management, conservation of biological diversity, management of biological resources and biodiversity, forest and wildlife conservation, and sustainabledevelopment and living.

*Community engagement and service:* The graduates should be able to demonstrate the capability to participate in community-engaged services/ activities for promoting the well-being of society.

*Empathy:* The graduates should be able to demonstrate the ability to identify with or understand the perspective, experiences, or points of view of another individual or group, and to identify and understand other people's emotions.

#### [c] Flexibility:

The programmes are flexible enough to allow liberty to students in designing them according to their requirements. The Learner is given freedom of choice in selecting disciplines. Students may select his/her own stream. He/She may select three major disciplines from his her own stream or two major disciplines from his own stream and one major discipline from any other stream . Alongwith major disciplines, a student can select minor disciplines from other streams, languages, generic electives, ability enhancement courses, Vocational/Skill Enhancement Courses (SEC) and Value added Courses including Extra Curricular activities.

**Multiple Entry & Exit Options:** 

ENTRY & EXIT OPTIONS	Credits
	Required
Certificate upon the Successful Completion of the First Year (Two Semesters) of the	44
multidisciplinary Four-year Undergraduate Programme.	
+ 04 Credit Mandatory Internship in Case of Exit.	
<b>Diploma</b> upon the Successful Completion of the Second Year (Four Semesters) of the	84
multidisciplinary Four-year Undergraduate Programme	
+ 04 Credit Mandatory Internship in Case of Exit.	
For Entry to NHEQF Level 5.0, must have completed the NHEQF 4.5 Level of Four Year	
Undergraduate Programme as per NEP-2020.	
<b>Basic Bachelor Degree</b> at the Successful Completion of the Third Year (Six Semesters)	120
of the multidisciplinary Four- year Undergraduate Programme.	
For Entry to NHEQF Level 5.5, must have completed the NHEQF 5.0 Level of Four Year	
Undergraduate Programme as per NEP-2020.	
Bachelor Degree with Honours / Honours with Research in a Discipline at the	160
Successful Completion of the Fourth Year (Eight Semesters) of the multidisciplinary	
Four-year Undergraduate Programme.	
For Entry to NHEQF Level 6.0, must have completed the NHEQF 5.5 Level of Four Year	
Undergraduate Programme as per NEP-2020.	

#### Programme Educational Objectives (PEOs):

	Programme outcomes (POs)
Physics a	having Degree in B.Sc. (with Physics) should have knowledge of different concepts and fundamentals of and ability to apply this knowledge in various fields of academics and industry. They may pursue their reer in the field of academics, research and industry.
PO 1	<ol> <li>Competence in the methods and techniques of calculations using Mechanics.</li> <li>Students are expected to have hands-on experience to apply the theoretical knowledge to solve practical problems.</li> </ol>
PO2	<ol> <li>Competence in the concepts of Thermodynamics and Statistical Mechanics.</li> <li>Students are expected to have hands on experience in Thermal Physics Experiments.</li> </ol>
PO 3	<ol> <li>Knowledge of electrical instruments, circuits and basic semiconductors.</li> <li>Student should be able to make basic electrical circuits and handle electrical instruments.</li> </ol>
PO4	<ol> <li>Knowledge of different concepts in Geometrical Optics.</li> <li>Students are expected to have hands on experience of Experiments of GeometricalOptics</li> </ol>
PO5	<ol> <li>Students are expected to have deep understanding of electricity and magnetism andmodern physics.</li> <li>Student should be able to make basic electrical circuits and handle electrical instruments.</li> </ol>
PO 6	<ol> <li>Comprehensive knowledge of Analog &amp; Digital Principles and Applications.</li> <li>Learn the integrated approach to analog electronic circuitry and digital electronics for R&amp;D.</li> </ol>
PO 7	<ol> <li>Knowledge of basic concepts of quantum mechanics their applications in technology</li> <li>Students are expected to have an insight in handling other optical instruments.</li> </ol>
PO 8	<ol> <li>Knowledge of basic concepts of advance electronics their applications in technology</li> <li>Student should be able to make advance electrical circuits and handle some advanceelectrical instruments.</li> </ol>
	Programme specific outcomes (PSOs):  UG I Year / Certificate course in Basic Physics

After completing this certificate course, the student should have

- Acquired the basic knowledge of Mechanics, waves- oscillation, Thermodynamics and statistical mechanics.
- Knowledge of different aspects of Thermal Physics which serves as a basis for many physical systems used in industrial applications and deals with the physics and technology of Engines andRefrigerators.
- Hands-on experience to apply the theoretical knowledge to solve practical problems of basic physical phenomena. He should be able to carry out experiments to understand the laws and concepts of Physics.
- An insight in understanding Mechanics, thermodynamics and in handling mechanical andthermodynamical instruments.

## Programme specific outcomes (PSOs): UG II Year/ (Diploma in Applied Physics)

After completing this diploma course, the student should have

- Knowledge of different concepts in Electrical circuits, Basic Semiconductor Physics and Geometrical Optics and laser.
- A deeper insight in Ray Optics to understand the Physics of many optical instruments which are widely used in research and Industry, Optoelectronics, IT and communication devices, and in industrial instrumentation.
- Knowledge of basic concepts of optical instruments with their applications in technology.
- With Hands- on training with electrical instruments and optical instruments widely used in different fields.

## Programme specific outcomes (PSOs): UG III Year and IV Year/ Bachelor of Science/ B. Sc. (Honors)/ B. Sc. (Honours with Research)

After completing this degree course, the student should have:

**PSO 1:** Knowledge of Mechanics and basic properties of matter. The course will empower him to apply his theoretical knowledge in various physical phenomena that occur in day to day life and he can use this scientific knowledge for the betterment of the society.

**PSO2:** Expertise in different aspects of Thermal Physics which serves as a basis for many physical systems used in industrial applications and deals with the physics and technology of Engines and Refrigerators.

**PSO3:** Understanding of basic concepts related to Electrical circuits and semiconductor physics. He should be proficient in designing and handling different electrical circuits.

**PSO4:** Proficient in the field of Optics which will increase his demand in research and industrial establishments engaged in activities involving optical instruments.

**PSO5:** Understanding of basic concepts related to Electricity and Magnetism, Basic knowledge in the field of Modern physics, which have utmost importance at both undergraduate and graduate level.

**PSO6:**Comprehensive knowledge of Analog & Digital Principles and Applications.

Learn the integrated approach to analog electronic circuitry and digital electronics for R&D.

**PSO7:** Understanding of basic concepts related to quantum mechanics and its application in different fields. Proficient in the field of Optics which will increase his demand in research and industrial establishments engaged in activities involving optical instruments.

**PSO8:** Comprehensive knowledge of Analog & Digital Principles and Applications. Learn the integrated approach to analog electronic circuitry and digital electronics for R&D.

Progr	ramme: B.Sc. (Honours/Honours with Research) in Ph	ysics	Year: I	Semester-I					
Pedag	gogy:								
Cour	se Code: PHY-23101	Course/ Pape [Practicals Lis	er Title: Practical (Mech	anical Properties)					
Cour	rse Outcomes								
After	completing this course, the students will be able to-								
	Experimental physics has the most striking impact on the	-							
determine the mechanical properties. Measurement precision and perfection is achieved through Lab Experiments.									
	Hands on experience of different equipments.								
Cred			Paper: Core Compulso						
	Marks: 40+ 60 (30T+30P)		Min. Passing Marks:	35					
	Number of Lectures (Lecture- Practical- Tutorial): 30	)+0+60		n					
No.	List of Practicals			Practical Hr.					
1	Fly wheel: To determine the moment of Inertia (I) of a f								
2	Compound Pendulum: To determine the value of 'g' wi	-	•						
	radius of gyration (k) of the pendulum about an axis pas	singthrough th	e centre of gravity and						
	perpendicular to its								
_	length.								
3	Rectangular Lamina: To determine:								
	<ul><li>(i) The value of 'g' with a rectangular lamina.</li><li>(ii) The Moment of Inertia (I) and Radius of Gyrat</li></ul>	: (1-) -f	ton oulon louring						
	(ii) The Moment of Inertia (I) and Radius of Gyrat about an axis passing through the centre of gravity and								
	lamina.	F F	F						
4	<b>Spiral Spring:</b> To determine the force per unit extension	n (K) and effect	tive mass (me) of a spiral	l- 60					
	spring			00					
	(static and dynamic method).  Maxwell's Needle: To determine the rigidity modulu	a of the mate	wiel in the form of a						
5	wire by	is of the mate	erial ili ule lorili of a						
	Maxwell's needle.								
6	<b>Surface Tension:</b> To determine the surface tension (T)	of water by Jae	ger's method.						
7	<b>Searle's Apparatus:</b> To determine Y, n and $\sigma$ of the ma apparatus.	terial of a give	n wire by Searle's						
8	Y by bending: To determine the Young's modulus (Y) o	f the material o	of the beam.						
9	Viscosity: To determine the viscosity of a liquid by Poiseuille's method.								
10									
	of inertia of an irregular body with the help of a torsiont								
11	Statistical Method: To determine the modulus of rigidi	ty of the given	material in the form of a	a					
	wire by statistical method.								

#### Suggested Readings

- 1. Practical Physics by S. K. Kor, R. P. Khare & S. K. Jain (United Book Depot, Allahabad)
- 2. Practical Physics by Arora (S. Chand Publisher)
- 3. Physics through experiments by B. Saraf (Vikas Publications), 2013.
- 4. An advanced course in practical physics by D. Chatopadhyay, PC Rakshit, B. Saha (New Central BookAgency Pvt Ltd.), 2002.
- 5. B.Sc. Practical Physics(Revised Edition) By C. L Arora (S.Chand & Co.), 2007.

#### This course can be opted as an Elective by the students of following subjects

Botany / Chemistry / Computer Science / Mathematics / Statistics / Zoology

#### Suggested Continuous Internal Evaluation (CIE) Methods

20 marks for Record File (depending upon the no. of experiments performed out of the total assigned experiments) 10 marks for Viva Voce

10 marks for Class Interaction

#### Suggested Continuous Internal Evaluation (CIE) Methods

Continuous Internal Evaluation shall be of 40% in two Steps in a Semester, C1(After 45 Days) & C2 (After 90 Days) respectively. Marks of Each Internal Assessment will be distributed as under ;Assignment/Practical/Projects – 05 Marks

Internal Class Test – 10 Marks
Attendance/Behavior – 05 Marks

Sugg	gested Readings:  1. Practical Physics by S. I. 2. Practical Physics by Arc.	K. Kor, R. P. Khare & S. K. Jain (	United Book Depot,Alla	habad)

- 2. Practical Physics by Arora (S. Chand Publisher)
- *3.* Physics through experiments by B. Saraf (Vikas Publications), 2013.
- 4. An advanced course in practical physics by D. Chatopadhyay, PC Rakshit, B. Saha (New Central BookAgency Pvt Ltd.), 2002.
- 5. B.Sc. Practical Physics(Revised Edition) By C. L Arora (S.Chand & Co.), 2007.

Course prerequisite: To study this course, the students must have had Science Subjects in class 12th

#### Suggested continuous Evaluation methods-

Continuous Internal Evaluation shall be of 40% in two Steps in a Semester, C1(After 45 Days) & C2 (After 90 Days) respectively. Marks of Each Internal Assessment will be distributed as under;

Assignment/Practical/Projects - 05 Marks Internal Class Test - 10 Marks Attendance/Behavior - 05 Marks

Programme: B. Sc. (Honours/Honours with Research) in Physics	Year: Second Year	Semester: III
Pedagogy:		
Course Code: PHYIKS-2302	Course Title: Applie	d IKS-1: Physics
Course Outcome: After completing this course, the students will be	e able to -	
CO. 1 : aware with the IKS in the context of physical sciences.		
CO. 2 : develop concept of Vedic Physics and Philosophy.		
CO. 3 : aware with Classical Indian Physics.		
CO. 4 : aware with Indian Mathematics and Astronomy.		
CO. 5: aware with Indian Medicine and Ayurvedic Physics.		
Credit: 2+0+0	Paper: Core Compu	lsory
Max. Marks: 40+60	Min Passing Marks:	35
Total Number of Lectures (Lecture +Tutorials +Practical): 30+0+0		
Unit 1: Introduction to Indian Knowledge System in Physics		06
<ul> <li>Definition and scope of Indian knowledge systems in the conference</li> </ul>	text of physics.	
<ul> <li>Historical overview of ancient Indian contributions to science</li> </ul>		
<ul> <li>Key texts and scholars in Indian physics.</li> </ul>		
Unit 2: Vedic Physics and Philosophy		06
Study of the philosophical and metaphysical foundations of Ir	ndian physics.	
Concepts like Prakriti (nature), Purusha (consciousness), and	their relevance to physi	cs.
<ul> <li>Vedic cosmology and its connection to modern cosmological</li> </ul>	theories.	
Unit 3: Classical Indian Physics		06
<ul> <li>Detailed exploration of classical Indian physics principles.</li> </ul>		
Theory of five elements (Panchabhuta) and the concept of eth	er (Akasha).	
<ul> <li>Concepts like sound (Nada), light (Prakasha), and heat (Tejas</li> </ul>	• •	
Unit 4: Indian Mathematics and Astronomy	7 1 7	06
Examination of Indian mathematical achievements, includin	g the invention of zero.	the decimal
system, and contributions to trigonometry.	8 ,	
Study of ancient Indian astronomical knowledge, including	ng the Siddhantas and	planetary
calculations.	-8	py
Unit 5: Indian Medicine and Ayurvedic Physics		06
Introduction to Ayurveda and its principles.		
<ul> <li>Concepts of doshas (bio-energies) and their relation to health</li> </ul>	and nhysics	
How Ayurvedic physics can be applied to modern understand		
Suggested Readings:	ing of the numan bouy.	

- "Indian Physics: Outline of Early History" by David Pingree This book provides a comprehensive overview of the early history of Indian physics and its contributions to science. It covers topics such as astronomy, mathematics, and classical Indian physics.
- "The Wisdom of the Vedas" by Jyotir Maya Nanda. This text explores the philosophical and metaphysical aspects of Indian knowledge systems, including those related to physics. It delves into Vedic concepts and their relevance to the understanding of the physical world.
- "The Crest of the Peacock: Non-European Roots of Mathematics" by George Gheverghese Joseph. While not focused solely on physics, this book explores the contributions of Indian mathematicians and their impact on mathematical and scientific thought. It can provide valuable insights into the mathematical foundations of Indian physics.
- "Ayurvedic Physics: Theory and Practice of Ayurveda" by Vasant D. Lad. This book delves into Ayurvedic physics, offering a detailed exploration of how Ayurvedic principles relate to the human body and the physical world. It discusses concepts like doshas and prana and their relevance to health and physics.
- "Quantum Yoga: The Science of Inner Transformation" by Amit Goswami. This book bridges the gap between quantum physics and Indian philosophy, particularly yoga and consciousness. It explores how quantum principles align with the concepts of consciousness and self-realization, providing a unique perspective on modern physics.

#### Suggested continuous Evaluation methods-

Continuous Internal Evaluation shall be of 40% in two Steps in a Semester, C1(After 45 Days) & C2 (After 90 Days) respectively. Marks of Each Internal Assesment will be distributed as under;

Assignment/Practical/Projects – 05 Marks Internal Class Test -10 Marks Attendance/Behavior -05 Marks

#### MINOR PAPER [For Students of Other Discipline/Subject]

Progra	mme: B.Sc. (Honours/Honours with Research) in Physics	Year: Se	cond	Semester: III
Pedago				
	e Code: MPHY03		Γitle: : Heat aı	nd Thermodynamics – I
	e Outcome: After completing this course, the students will be a	ble to -		
	O1:To aware with basic phenomenon in gases			
	22: Students are able to get information about different laws of the		ics and their ap	oplication in daily life
	3: To aware students with thermal potentials and their significant			
	04: Useful to understands low temperature phenomena in thermal			
CC	O5: To get expertise in Experimental handling of the instruments w	vith thermo	dynamics.

SN	List of Practicals		Practical
			(Hrs.)
1	Nodal Slides: To locate the cardinal points of an optical system	ns with the help of a nodal slide	
	and hence to determine the focal length of the system.		
2	<b>Sextant:</b> With the help of a sextant to determine the following		
	(i) Variation of Zero-Error of the sextant with distance.		
	(ii) Height of the tower.		
	(iii) Horizontal distance between two objects or points		
3	Dispersive Power of the Prism: To determine the refractive i	ndex (µ) of the material of the	7
	prism for a given wave lengths and dispersive power (ω) of the	ne materials of the prism with a	
	spectrometer.	•	
4	Newton's Rings: To determine the wavelength (λ) of sodium li	ght by Newton's ring method.	7
5	Fresnel's Bi-prism: To determine the wavelength of sodium ligh	nt with Fresnel's Bi- prism.	7
6	Single Slit Diffraction: To determine the width of a narr		60
	diffraction bands.		
7	<b>Plane Transmission Grating:</b> To determine the wavelength emitted by light source with a plane transmission grating.	$(\lambda)$ of different spectral lines	
8	Brewster's Law: To measure the angle of polarization f	or glass and to measure the	
	refractive index using Brewster's law.		
9	<b>Polarimeter:</b> To determine the specific rotation $(\mathbf{C})$ of an o sugar solution) with the help of a polarimeter.	ptically active substance (cane	
10	Spectrometer: Refractive index of water and prism material	hv	-
10	(i) Total internal reflection.	by	
	(ii) Grazing incidence methods		
Sugges	ted Readings:		_
1.	Practical Physics by S. K. Kor, R. P. Khare & S. K. Jain (Unite	d Book Depot,Allahabad)	
2.	Practical Physics by Arora (S. Chand Publisher)	1

#### **SEMESTER-V**

_					
	, ,	Year: B.Sc. III <sup>rd</sup> Year	Semester: V		
Pedagogy:  Course Code: PHY-23105  Course Title: Electromagnetic Perspective of Modern Physical Perspective Of Modern Physic					
Course Outcome: After completing this course, the students will be able to -					
	CO1: Better understanding of electrical and magnetic phenomenon in daily life.				
CO2: Understand Amperes law, biot- savart law and its different applications.					
	CO3: To troubleshoot simple problems related to electromagnetic theory and waves.				
	tudy the fundamental physics behind atoms about spectrum e.g. a letter understanding of nuclear physics and Elementary particles		of materials.		
Credit	: 2+0+2	Paper : Core Compuls	ory		
	Marks: 40+60 (30T+30P)	Min Passing Marks: 3	5		
	Number of Lectures (Lecture +Tutorials + Practical): 30+0+60				
Unit	Topics		No. of Lecture		
I	Electrostatics Electrostatics in Free Space: Coulomb Law, Electric Field. Simple case of charge distributions. Gauss Flux Law (Integral and Differential forms). Electric Dipole in Electrostatic Field. Irrotational Nature of Electric Field. Simple Cases of Charge Distributions. Electrostatics in Dielectrics: Polarization, Polarization Charges. Displacement Vector D. Gauss Flux Law (Integral and Differential forms) and simple Applications. Energy of Charge Distribution. Energy as an integral over the Field. Simple Problems (Parallel Plate				
		ipie i robiemo (i aranei i			
II	Condenser, Uniformly chargedspherical surface and volume).  Magneto statics  Ampere's Law, Biot- Savart's Law, Law of force in Magnetic Field on Currents and charged particles. Magnetic Filed due to a straight infinite wire. Magnetic Field due to circular loop and solenoid at axial points. Vector potential and its evaluation for uniform Magnetic Field due to a Loop of Current. Magnetic Moment. Magnetic Materials and Magnetization. Magnetization Current density J, Magnetic Field H, Curl of H and Calculation of H.				
Ш	Time Varying Fields & Electromagnetic Waves in Free-Space Time Varying Fields: Displacement Current, Curl H Faraday's Law (Integral and Differentia forms). Self and Mutual Inductances. Energy of Coupled Circuits and current distribution.  M 22L <sub>1</sub> L <sub>2</sub> . Energy as an integral over the Magnetic Field. Energy of Solenoid. Electromagnetic Waves in Free-Space: Maxwell Equations, Plane polarized Plane Wave solution. Characteristics of these Electromagnetic waves.				
IV	Atomic Physics Bohr-Summerfield Model (Historical developments), Bohr hydrogenic atoms, critical resonance and the ionization potent Characteristic and continuous X-rays. Moseley's law,Bragg's Last Space Quantization, Magnetic moment of the electrons and matelectron Spin, Stern- Gerlach experiment, Quantative concept of an electron, Pauli's exclusion principle and electronic configuagnetic Properties of Materials Diamagnetism, Larmor's theory and diamagnetic susceptibilit theory and Curie Weiss Law. Qualitative discussion of ferromagnetism.	ial. Frank- Hertz experime aw. gnetron, Larmor Precessi of various quantum numb gurations of atoms. y. Paramagentism, Langvi	ent. on, eers n's		
V	ferromagnetism. <b>Nuclear physics</b> Natural radioactivity, Laws of radioactive disintegration, radioactive series, Detection of radiation, GM Counter and Bubble Chamber, Scintillation Counter. Kinematics of nuclear reactions, artificial nuclear transmutation, discovery of neutron, radioactive tracers, transuranic elements. Cyclotron. Constitution of nucleus, Binding energy, liquid drop model and the semi-empirical mass formula, Elementary theory of $\alpha$ -decay, $\beta$ -decay and discovery of neutrino Magic numbers and the shell model, exchange forces in nuclei and Yukawa theory qualitative), Fission and fusion, Nuclear reactors (qualitative), Thermonuclear energy. Elementary Particles, Classification of Elementary Particles, Leptons, Mesons and Baryons and their quantum numbers, Conservation Laws.				

#### Suggested Readings:

- 1. Introduction to Electrodynamics 3/e by D. J. Griffiths (Phi Learning).
- 2. Berkeley Physics Course, Vol 2: Electricity and Magnetism by E. M. Purcell(McGraw-Hill).
- 3. Electromagnetic by B. B. Laud (New Age International Pvt. Ltd. New Delhi).
- 4. Modern Physics by author Beiser.
- 5. Modern Physics by R. Murugation.
- 6. Introduction to Electromagnetictheory by Prof. Ram Kripal

Course prerequisite: To study this course, the students must have had Science Subjects in class 12th

systems in physics.		
Suggested Readings:		
1 "Indian Physics: Outline of Farly History" by David Pin	gree This book pro	vides a comprehensive

- 1. "Indian Physics: Outline of Early History" by David Pingree. This book provides a comprehensive overview of the early history of Indian physics and its contributions to science. It covers topics such as astronomy, mathematics, and classical Indian physics.
- 2. "The Wisdom of the Vedas" by Jyotir Maya Nanda. This text explores the philosophical and metaphysical aspects of Indian knowledge systems, including those related to physics. It delves into Vedic concepts and their relevance to the understanding of the physical world.
- 3. "The Crest of the Peacock: Non-European Roots of Mathematics" by George Gheverghese Joseph. While not focused solely on physics, this book explores the contributions of Indian mathematicians and their impact on mathematical and scientific thought. It can provide valuable insights into the mathematical foundations of Indian physics.
- 4. "Ayurvedic Physics: Theory and Practice of Ayurveda" by Vasant D. Lad. This book delves into Ayurvedic physics, offering a detailed exploration of how Ayurvedic principles relate to the human body and the physical world. It discusses concepts like doshas and prana and their relevance to health and physics.
- 5. "Quantum Yoga: The Science of Inner Transformation" by Amit Goswami. This book bridges the gap between quantum physics and Indian philosophy, particularly yoga and consciousness. It explores how quantum principles align with the concepts of consciousness and self-realization, providing a unique perspective on modern physics.

Course prerequisite: To study this course, the students must have had Science Subjects in class 12th

 Year: B.Sc. 4th Year
 Semester: VIIIth

 Pedagogy:
 Course Code: PHY-23115A
 Course/Paper
 Dissertation/Research Project & Viva voce [For Hons.]

 Title:
 with Research Students]

Course Outcomes: After completing this course, the students will be able to -

CO 1: acquire Research Skills and awareness about Methodology

**CO 2:** develop critical thinking skills for evaluating existing literature and research gaps.

CO 3: develop Communication Skills, Analytical and Problem-Solving abilities.

CO 4: develop Project Management and will be able to contribute to existing knowledge

CO 5: Collaborate in Interdisciplinary Skills.

Credit: 0+0+12	Paper (Core Compulsory / Elective): Elective
Max. Marks : 100	

Total Number of Lectures (Lecture - Tutorials - Practical): 0+0+360

Units:	Topics:	Practicals Hrs
I	Dissertation/ Research Project & Viva Voce	360

#### Suggested Readings:

#### General Research Methodology

1. Kothari, C. R. & Garg, Gaurav

Research Methodology: Methods and Techniques

- New Age International Publishers
- A foundational book on qualitative and quantitative research methods.
- 2. Creswell, John W.

Research Design: Qualitative, Quantitative, and Mixed Methods Approaches

- SAGE Publications
- Comprehensive guidance for designing and conducting research.
- 3. Neuman, W. Lawrence

Social Research Methods: Qualitative and Quantitative Approaches

- Pearson Education
- Ideal for social sciences and interdisciplinary studies.
- 4. Ranjit Kumar

Research Methodology: A Step-by-Step Guide for Beginners

- SAGE Publications
- Practical guide with examples, useful for first-time researchers.

#### Academic Writing & Dissertation Structuring

- 5. Turabian, Kate L.
  - A Manual for Writers of Research Papers, Theses, and Dissertations
  - University of Chicago Press
  - Covers formatting, citation styles, and academic tone.
- 6. Walliman, Nicholas

Your Research Project: A Step-by-Step Guide for the First-Time Researcher

- SAGE Publications
- Student-friendly guide to planning and writing a dissertation.
- 7. Booth, Wayne C., Colomb, Gregory G., & Williams, Joseph M.

The Craft of Research

- University of Chicago Press
- Insightful resource on forming arguments, framing research questions, and structuring.

# Subject-Specific & Technical Writing

8. Day, Robert A. & Gastel, Barbara

How to Write and Publish a Scientific Paper

- Cambridge University Press
- Ideal for students in science, engineering, and health disciplines.
- 9. Denscombe, Martyn

The Good Research Guide: For Small-Scale Social Research Projects

- Open University Press
- Excellent for undergraduate dissertations and small research projects.
- Plagiarism, Referencing & Ethics
  - 10. American Psychological Association (APA) *Publication Manual of the APA* (7th Edition)
    - -APA
    - For academic writing, referencing, and ethical research practices.
  - 11. MLA Handbook (9th Edition)
    - Modern Language Association
    - Referencing guide for literature, humanities, and liberal arts.
  - 12. Office of Research Integrity (ORI), USA

Introduction to the Responsible Conduct of Research

• Free online guide on ethics, plagiarism, authorship, and data handling.

#### Suggested continuous Evaluation Methods -

Continuous Internal Evaluation shall be of 40% in two Steps in a Semester , C1(After 45 Days) & C2 (After 90 Days) respectively. Marks of Each Internal Assessment will be distributed as under ;

Assignment/Practical/Projects – 05 Marks Internal Class Test – 10 Marks Attendance/Behavior – 05 Marks
