#### **Introduction of the Programme:**

#### [a] Introduction:

The NEP-2020 offers an opportunity to effect a paradigm shift from a teacher-centric to a student-centric higher education system in India. It is based on Outcome Based Education, where the Graduate Attributes are first kept in mind to reverse-design the Programs, Courses and Supplementary activities to attain the graduate attributes and learning outcomes. The learning outcomes-based curriculum framework for a degree in B.A. (Honours/Honours with Research) in Economics is intended to provide a comprehensive foundation to the subject and to help students develop the ability to successfully continue with further studies and research in the subject while they are equipped with required skills at various stages. The framework is designed to equip students with valuable cognitive abilities and skills so that they are successful in meeting diverse needs of professional careers in a developing and knowledge-based society. The curriculum framework takes into account the need to maintain globally competitive standards of achievement in terms of the knowledge and skills, as well as to develop spirit of enquiry, problem solving skills and human and professional values which foster rational and critical thinking in students.

#### [b] Graduate Attributes:

| Type of learning outcomes  | The Learning Outcomes Descriptors  |
|--|--|
| Learning outcomes that are specific to disciplinary/ interdisciplinary areas of learning | Disciplinary/ interdisciplinary Knowledge & Skills   |
| Generic learning outcomes  | Critical Thinking & problem-solving Capacity   |
| outcomes   | Creativity   |
|  | <ul> <li>Communication Skills: The graduates should be able to demonstrate the skills that enable them to:</li> <li>listen carefully, read texts and research papers analytically, and present complex informationin a clear and concise manner to different groups/audiences,</li> <li>express thoughts and ideas effectively in writing and orally and communicate with othersusing appropriate media,</li> <li>confidently share views and express herself/himself,</li> <li>construct logical arguments using correct technical language related to a field of learning, work/vocation, or an area of professional practice,</li> <li>convey ideas, thoughts, and arguments using language that is respectful and sensitive togender and other minority groups.</li> </ul> |
|  | <ul> <li>Analytical reasoning/thinking: The graduates should be able to demonstrate the capability to:</li> <li>evaluate the reliability and relevance of evidence;</li> <li>identify logical flaws in the arguments of others;</li> <li>analyze and synthesize data from a variety of sources;</li> <li>draw valid conclusions and support them with evidence and examples, and addressingopposing viewpoints.</li> </ul>   |

**Research-related skills:** The graduates should be able to demonstrate:

- a keen sense of observation, inquiry, and capability for asking relevant/ appropriate questions,
- the ability to problematize, synthesize and articulate issues and design research proposals,
- the ability to define problems, formulate appropriate and relevant research questions, formulate hypotheses, test hypotheses using quantitative and qualitative data, establish hypotheses, make inferences based on the analysis and interpretation ofdata, and predict cause-and-effect relationships,
- the capacity to develop appropriate methodology and tools of data collection,
- the appropriate use of statistical and other analytical tools and techniques,
- the ability to plan, execute and report the results of an experiment or investigation,
- the ability to acquire the understanding of basic research ethics and skills in practicing/doing ethics in the field/ in personal research work, regardless of the funding authority or field of study.

**Coordinating/collaborating with others**: The graduates should be able to demonstrate the ability to:

- work effectively and respectfully with diverse teams,
- facilitate cooperative or coordinated effort on the part of a group,
- act together as a group or a team in the interests of a common cause and workefficiently as a member of a team.

*Leadership readiness/qualities:* The graduates should be able to demonstrate the capability for:

- mapping out the tasks of a team or an organization and setting direction.
- formulating an inspiring vision and building a team that can help achieve the vision, motivating and inspiring team members to engage with that vision.
- using management skills to guide people to the right destination.

*'Learning how to learn' skills:* The graduates should be able to demonstrate the ability to:

- acquire new knowledge and skills, including 'learning how to learn' skills, that are necessary for pursuing learning activities throughout life, through self-paced and self- directed learning aimed at personal development, meeting economic, social, and cultural objectives, and adapting to changing tradesand demands of the workplace, including adapting to the changes in work processes in the context of the fourth industrial revolution, through knowledge/ skill development/reskilling,
- work independently, identify appropriate resources required for further learning,
- acquire organizational skills and time management to set self-defined goals and targets withtimelines.
- inculcate a healthy attitude to be a lifelong learner,

*Digital and technological skills:* The graduates should be able to demonstrate the capability to:

- use ICT in a variety of learning and work situations,
- access, evaluate, and use a variety of relevant information sources,
- use appropriate software for analysis of data.
- National & International Perspective considering the current perspective of a Global Village.

*Value inculcation:* The graduates should be able to demonstrate the acquisition of knowledge and attitude that are required to:

- embrace and practice constitutional, humanistic, ethical, and moral values in life, including universal human values of truth, righteous conduct, peace, love, nonviolence, scientific temper, citizenship values,
- practice responsible global citizenship required for responding to contemporary

global challenges, enabling learners to become aware of and understand global issues and to become active promoters of more peaceful, tolerant, inclusive, secure, and sustainable societies,

- formulate a position/argument about an ethical issue from multiple perspectives
- identify ethical issues related to work, and follow ethical practices, including avoiding unethical behaviour such as fabrication, falsification or misrepresentation of data, or committing plagiarism, and adhering to intellectual property rights,
- recognize environmental and sustainability issues, and participate in actions to promote sustainable development.

Autonomy, responsibility, and accountability: The graduates should be able to demonstrate the ability to:

- apply knowledge, understanding, and/or skills with an appropriate degree of independence relevant to the level of the qualification,
- work independently, identify appropriate resources required for a project, and manage a project through to completion,

**Environmental awareness and action:** The graduates should be able to demonstrate the acquisition of and ability to apply the knowledge, skills, attitudes, and values required to take appropriate actions for:

• mitigating the effects of environmental degradation, climate change, and pollution, effective waste management, conservation of biological diversity, management of biological resources and biodiversity, forest and wildlife conservation, and sustainable development and living.

Community engagement and service: The graduates should be able to demonstrate the capability to participate in community-engaged services/ activities for promoting the well-being of society.

**Empathy:** The graduates should be able to demonstrate the ability to identify with or understand the perspective, experiences, or points of view of another individual or group, and to identify and understand other people's emotions.

#### [c] Flexibility:

The programmes are flexible enough to allow liberty to students in designing them according to their requirements. The Learner is given freedom of choice in selecting disciplines. Students may select his/her own stream. He/She may select three major disciplines from his her own stream or two major disciplines from his own stream and one major discipline from any other stream . Alongwith major disciplines, a student can select minor disciplines from other streams, languages, generic electives, ability enhancement courses, Vocational/Skill Enhancement Courses (SEC) and Value added Courses including Extra Curricular activities.

#### **Multiple Entry & Exit Options:**

#### [c] Multiple Entry & Exit Options:

| ENTRY & EXIT OPTIONS  | Credits Required |
|---|------------------|
| <b>Certificate</b> upon the Successful Completion of the First Year (Two Semesters) | 44               |
| of the multidisciplinary Four-year Undergraduate Programme.[NSQF Level 5]           |                  |
| + 04 Credit Mandatory Internship in Case of Exit.                                   |                  |
| <b>Diploma</b> upon the Successful Completion of the Second Year (Four Semesters)   | 84               |
| of the multidisciplinary Four-year Undergraduate Programme[NSQF Level 6]            |                  |
| + 04 Credit Mandatory Internship in Case of Exit.                                   |                  |
| For Entry to NHEQF Level 5.0, must have completed the NHEQF 4.5 Level of            |                  |
| Four Year Undergraduate Programme as per NEP-2020.                                  |                  |
| Basic Bachelor Degree at the Successful Completion of the Third Year (Six           | 120              |
| Semesters) of the multidisciplinary Four- year Undergraduate Programme.             |                  |

| For Entry to NHEQF Level 5.5, must have completed the NHEQF 5.0 Level of  |     |
|---|-----|
| Four Year Undergraduate Programme as per NEP-2020.                        |     |
| Bachelor Degree with Honours/Honours with Research in a Discipline at the | 160 |
| Successful Completion of the Fourth Year (Eight Semesters) of the         |     |
| multidisciplinary Four-year Undergraduate Programme.                      |     |
| For Entry to NHEQF Level 6.0, must have completed the NHEQF 5.5 Level of  |     |
| Four Year Undergraduate Programme as per NEP-2020.                        |     |

#### **Programme Educational Objectives (PEOs):**

#### **Programme Outcomes (POs):**

#### By the End of the Programme, the graduate will:

- PO1. be able to apply economic theories & concepts to analyse & solve real-world economic problems.
- PO2. Posses strong quantitative skills, including the ability to collect, analyze and interpret the data using statistical and economic techniques.
- PO3. Skilled in critically evaluating economic arguments, policies and debates & making well reasoned judgement based on economic principles.
- PO4. Understand the global nature of economics, trade & International economics Institutions.
- PO5. be capable of conducting Independent research, including formulating research questions, designing studies, interpretting findings.
- PO6. be able to apply economics principles to various fields, such as Finances, Public Policy, environmental Economy and more.

#### **Programme Specific Outcomes (PSOs):**

#### **Course Objectives and Outcomes:**

The objective of this course is to provide students with a foundational understanding of economic principles, theories, and applications. It aims to introduce key concept of micro economics and Macro Economics, enabling students to analyse economic problems and decision — making processes at both individual and social levels. The course fasters critical thinking and problem solving skills related to resource allocation, production, consumption, market structures, and government policies.

After completing this course, the students will be able to -

**CO 1:** Understanding Basic Economic Concepts – Explain fundamental economic principles, including scarcity, opportunity cost and economic decision-making.

CO 2: Micro Economic Principles.

CO 3: Consumer Behaviour.

**CO 4:** Application of Economic Theories.

CO 5: Introduction of different Market in Economics.

#### **Suggested Readings:**

- 1. "Regional Economic Integration" by Jeffrey J. Schott: This textbook provides a comprehensive overview of regional economic integration and cooperation, discussing various trade agreements, customs unions, and regional organizations.
- 2. "Regional and Global Monetary Cooperation: New Challenges for Global Governance" by Michael G. Plummer: This book focuses on the monetary aspects of regional economic cooperation, including currency arrangements, exchange rate policies, and the challenges of coordinating monetary policies across regions.
- 3. "Regional Integration: Key Concepts, Theories, and Analyses" by Miroslav N. Jovanović: This book offers a theoretical exploration of regional integration, covering concepts like trade creation, trade diversion, economic convergence, and the role of institutions in promoting cooperation.
- 4. "The Economics of Regional Integration: Theory, Measurement, and Policy" by M. M. K. Sengupta: This textbook provides a balanced approach to understanding the economic theory behind regional integration, along with discussions on policy implications and measurement techniques.
- 5. "Regional Economic Integration in a Global Framework" by J. Michael Finger and Philip Schuler: This book examines the economic and political aspects of regional economic integration, using case studies to illustrate the challenges and benefits of cooperation among neighboring countries.
- 6. "Handbook of Research on Comparative Economic Development Perspectives on Europe and the MENA Region" edited by Mehmet Ugur: This handbook covers various aspects of economic development and cooperation between Europe and the Middle East and North Africa (MENA) region, offering insights into the challenges and opportunities of cross-regional cooperation.
- 7. "Regional Cooperation and Integration in Africa" by Mulu Gebreeyesus: Focusing on the African continent, this book explores the dynamics of regional cooperation, trade, and integration among African countries, analyzing the potential for economic growth and development.
- 8. "ASEAN Economic Community: A Model for Asia-wide Regional Integration?" edited by Sanchita Basu Das and Maria Monica Wihardja: This book concentrates on the economic integration efforts within the Association of Southeast Asian Nations (ASEAN) and assesses its potential as a model for broader regional integration in Asia.

This course can be opted as an elective by the students of other discipline.

| Course Code: ECO-23106B   | Course/Paper | r Title: | Environmental Econo     | omics                        |

#### **Course Objectives:**

Attendance/Behavior –

The course aims to:

1. Introduce the fundamental concepts of environmental economics.

05 Marks

- 2. Understand the relationship between the economy and the environment.
- 3. Analyze environmental problems using economic tools.
- 4. Explore policy instruments for environmental management.
- 5. Develop a critical understanding of sustainable development and global environmental issues.

#### **Course Outcomes (COs):**

After successful completion of the course, students will be able to:

**CO1:** Understand and explain the basic concepts and theories of environmental economics.

CO2: Analyze market failures and externalities associated with environmental issues.

**CO3:** Evaluate economic instruments and policy tools used for environmental protection.

**CO4:** Assess environmental valuation techniques and their applications.

**CO5:** Critically examine sustainable development concepts and global environmental challenges.

| rigorous approach to economic analysis.  |   |           |                          |              |                      |  |  |

- 2. "Intermediate Microeconomics: A Modern Approach" by Hal R. Varian: This textbook offers a modern perspective on microeconomic theory and applications. It's widely used for its clear explanations, real-world examples, and emphasis on decision-making at the individual level.
- 3. "Macroeconomics" by Olivier Blanchard: This textbook provides a solid foundation in macroeconomic analysis. It covers topics such as economic growth, business cycles, monetary and fiscal policy, and more. The book is praised for its accessibility and relevance.
- "Principles of Economics" by N. Gregory Mankiw: Mankiw's textbook is a popular choice for introductory economics courses. It covers both microeconomics and macroeconomics and is known for its user-friendly writing style, real-world applications, and clear explanations of economic concepts.
- 5. "Advanced Macroeconomics" by David Romer: This book is suitable for those who want to delve deeper into macroeconomic theory. It covers topics like economic growth, monetary and fiscal policy, and the role of expectations in macroeconomic outcomes. It's often used in advanced undergraduate or graduate courses.
- 6. "Indian Economy" by Ramesh Singh: This textbook provides a comprehensive overview of the Indian economy, covering topics such as economic development, planning, agriculture, industry, and more. It's widely used for various competitive exams and academic courses.
- 7. "Indian Economy: Performance and Policies" by Uma Kapila: This book offers a detailed analysis of the Indian economy's performance and policies, including topics like economic reforms, fiscal policy, monetary policy, and sectoral issues.
- 8. "Indian Economy: Problems and Prospects" by Bimal Jalan: Bimal Jalan, a renowned economist and former governor of the Reserve Bank of India, provides insights into the challenges and prospects of the Indian economy, addressing issues like inflation, poverty, and economic governance.
- 9. "Economic Survey of India" by Ministry of Finance, Government of India: While not a traditional textbook, the Economic Survey of India, released annually by the Ministry of Finance, provides in-depth analysis of various economic aspects, policies, and challenges in India. It's a valuable resource for understanding the country's economic trends and issues.
- 10. "Modern Economic Theory" by K. K. Dewett: Although not exclusively focused on the Indian economy, this book is widely used in Indian economics education. It covers various topics in microeconomics and macroeconomics and has been a staple for economics students in India for decades.

"The Worldly Philosophers: The Lives, Times, and Ideas of the Great Economic Thinkers" by Robert L. Heilbroner: While not a traditional textbook, this book offers engaging biographical sketches of influential economists, making the history of economic thought come alive. It provides insights into

the lives and ideas of thinkers like Adam Smith, Karl Marx, and John Maynard Keynes.

- 3. "History of Economic Thought: A Critical Perspective" by E.K. Hunt and Mark Lautzenheiser: This textbook offers a critical examination of the evolution of economic ideas. It presents different schools of thought, their critiques, and their impact on economic theory and policy.
- 4. "A History of Economic Thought" by Lionel Robbins: This classic text provides a comprehensive analysis of economic thought from ancient times to the 20th century. It explores the development of economic ideas in the context of changing economic, social, and political environments.
- 5. "The Evolution of Economic Thought" by Stanley Brue and Randy Grant: This textbook focuses on the evolution of economic ideas and theories, discussing their historical context and the thinkers who shaped them. It covers a wide range of economic perspectives, from classical to modern theories.
- 6. "Indian Economic Thought: A Critical History" by Raj Kumar Sen: This book offers an in-depth exploration of Indian economic thought from ancient to modern times. It covers the contributions of Indian thinkers to economic theory and their relevance in the global context.
- 7. "History of Economic Thought: A Critical Perspective" by A. K. Bagchi: Focusing on the evolution of economic ideas in India, this book provides insights into the development of economic thought within the Indian context. It discusses both indigenous economic theories and the influence of Western economic ideas.
- 8. "Economic Thought in Ancient India" by D. N. Jha: This book delves into the economic ideas and practices of ancient India, exploring concepts like economic organization, trade, agriculture, and governance in historical Indian societies.
- 9. "Indian Economic Thought: Themes and Approaches" by Amiya Kumar Bagchi: This text examines the evolution of economic thought in India through different periods, addressing themes like value theory, distribution, and economic policies. It also discusses the intersection of Western and Indian economic ideas.
- 10. "Indian Economic Thought" by Raghbendra Jha: This book offers a comprehensive overview of Indian economic thought, tracing its development from classical to modern times. It covers the contributions of prominent Indian economists and their impact on policy and theory.
- 11. History of Economic Thought: V.C. Sinha
- 12. History of Economic Thought: T.N. Hojals
- 13. Ten Grat Economists: J.N. Shumptor

- 1. "Research Design: Qualitative, Quantitative, and Mixed Methods Approaches" by John W. Creswell and J. David Creswell
  - This book covers various research designs and approaches, helping you select the most appropriate one for your dissertation. It's suitable for both qualitative and quantitative research.
- 2. "The Craft of Research" by Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams
  This book is a comprehensive guide to the research process, from formulating research questions to
  presenting findings. It offers practical advice and strategies for effective research.
- 3. "How to Write a Better Thesis" by David Evans, Paul Gruba, and Justin Zobel Geared towards graduate students, this book provides practical guidance on planning, writing, and revising a thesis or research project. It covers a range of disciplines and research methods.
- 4. "Completing Your Qualitative Dissertation: A Roadmap from Beginning to End" by Linda Dale Bloomberg and Marie F. Volpe
  - Focused on qualitative research, this book offers step-by-step guidance on the entire dissertation process, including choosing a topic, data collection, analysis, and writing.
- 5. "Writing Your Dissertation in Fifteen Minutes a Day" by Joan Bolker
  This book offers practical strategies to help you overcome writer's block and procrastination while writing
  your dissertation. It emphasizes consistent writing habits.
- "The Dissertation Journey: A Practical and Comprehensive Guide to Planning, Writing, and Defending Your Dissertation" by Carol M. Roberts
   This book provides a holistic approach to the dissertation process, covering topics such as time

management, literature review, research design, and defense preparation.

- 7. "How to Design, Write, and Present a Successful Dissertation Proposal" by Elizabeth A. Wentz Focusing on the proposal stage, this book offers guidance on crafting a clear and effective dissertation proposal, including outlining research questions and methodologies.
- 8. "Writing the Successful Thesis and Dissertation: Entering the Conversation" by Irene L. Clark This book emphasizes the importance of contributing to the scholarly conversation in your field and provides practical advice on how to structure and present your research.
- 9. "The Literature Review: Six Steps to Success" by Lawrence A. Machi and Brenda T. McEvoy A comprehensive guide to conducting a literature review, a crucial component of any research project or dissertation.
- 10. "Demystifying Dissertation Writing: A Streamlined Process from Choice of Topic to Final Text" by Peg Boyle Single
  - This book offers a straightforward and organized approach to the dissertation process, helping you break down the tasks and stay on track.

<u>Suggested continuous Evaluation Methods –</u>

Continuous Internal Evaluation shall be of 40% in two Steps in a Semester, C1(After 45 Days) & C2 (After 90 Days) respectively. Marks of Each Internal Assessment will be distributed as under; Assignment/Practical/Projects – 05 Marks

Internal Class Test – 10 Marks Attendance/Behavior – 05 Marks

Four-year Undergraduate Programme.

Or

Field Visit/ Educational Visit based Report & Viva Voce [Course Code : ECO-23214B] for (Hons. Students) 12 Credits

Completion of the Programme: Bachelor Degree with Honours/Honours with Research in Major Discipline at the Successful Completion of the Fourth Year (Eight Semesters) of the multidisciplinary
