### Time Management

"Our Universities are so engrossed today with the task of conducting examinations and innumerable meetings of boards and faculties, courts and counsels, senate and syndicate that they have no time to perform the highest function of a university – which is to stimulate intellectual activity and advance knowledge".

### Undergraduate Students should leave the University having acquired certain abilities, values and commitments.

- > Knowing what one doesn't know and how to seek information
- > Able to think: that is, to reason inductively and deductively, to analyze and to synthesize, to think through moral and ethical issues, to construct a logical argument with appropriate evidence
- > Able to communicate clearly, substantively, and persuasively both orally and in writing.
- > Knowing how to authenticate information, whether it comes from print sources or through new technologies
- > Able to collaborate with others from different disciplines in the recognition that multidisciplinary approaches are necessary to address the major issues facing society
- > Understanding the methods of scientific inquiry; that is, scientifically literate

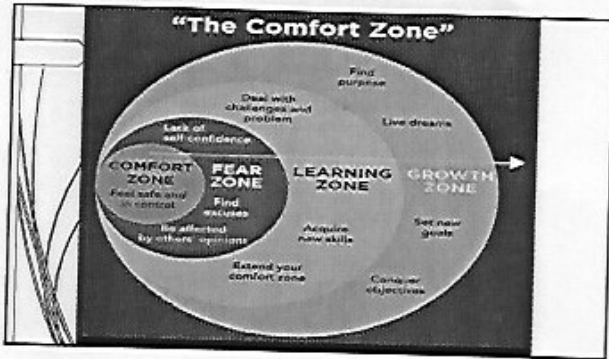

### Many Teachers

Sanskrit words for "Teacher" based on their unique abilities...

1. The teacher who gives you information is called : *Adhyapak*.
2. The one who imparts knowledge combined with information is called: *Upadhyaya*
3. The one who imparts skills is called : *Acharya*.
4. The one who is able to give a deep insight into a subject is called : *Pandit*.
5. The one who has a visionary view on a subject and teaches you to think in that manner is called: *Dhrista*.
6. The one who is able to awaken wisdom in you, leading you from darkness to light, is called: *Guru*

Sanskrit is, perhaps, the only language that has such a refined vocabulary to distinguish the different kinds of teachers.
